A NEW DEPARTMENT AT MY. URION COLron.-We notice that at the last annual neeting of the trustees of Mt. Union Colege it was decided to organize, in advance opening the college upon the scholarship lan, a first-class musical department. All the arrangements are now made for

establishing a musical department of the highest order. As a guarantee of its sucess we deem it only necessary to say that whatever the college undertakes, it generaly accomplishes, and that it has employed Prof. H. S. Leland, of New York, to take charge of this department.

Prof. Leland has been for several years : distinguished organist and teacher of instrumental music in the Eastern States, and is well known to the public as a thoroughly educated musician, an accomplished performer, a popular composer and a successful teacher. Ha is prepared to give instruction in all kinds of vocal and instrumental music, thorough bass, harmony and musical composition. First class planes have been purchased, and the rates of tuition and board, in this as well as in the classics and sciences, are lower than at any other institution of the kind in the country. The endowment enterprise is progressing satisfactorily, and arrangements are being made to double the number of rooms and boarding facilities. The sessions begin about the second Tuesday of August, November and March of each year, and the locality of the college is moral, healthy and accessible. Mt. Union College has an efficient Faculty and Board of Trustees, and has regularly grown, until it new ranks among the first

The race was from Detroit to Malden, a distance of twenty miles. The terms of the wager, \$760, were these: The Reindeer was to start simultaneously with the Pearl, from Detroit, and reach Malden two minutes before the Poarl. The result of the trial was that the Reindoer reached Malden one minute and forty seconds in advance of the Poarl, or twenty seconds behind time. The wager was, therefore, won by the latter.

But as I learn that it was supposed, from the use of my name in the above connec-tion, that I favored the opening of the "Varieties" without such restrictions and safeguards as would, in fact, transform it alleged original character almost complete ly. I may state that, as a matter of publi duty, numerous complaints having been made of the nature of the exhibitions there in company with another member of the City Council, I once visited the "Varieties" to secretain, from personal observation, the facts in the case. The place, as then conducted, seemed to me to be immoral in all its accessories and tendencies; and to have for its almost exclusive habitues that class of our youth most susceptible to evil influ-ences, together with a large representation of thoroughly deprayed "irrecisimables," whose presence alone would clearly indi-cate the low character of the "show." Buch a place of resort I cannot, even by

implication, be supposed to endorse or ap prove of; the only question in my mind being whether, if rendered unobjectionable, a license could legally be refused. But, if these conditions on which the proposed re-opening of the "Varieties" was to be based, have not been complied with, I am convinced, from my own observation, that its "exhibitions" cannot but have a most demoralizing effect upon those who attend them, greater, perhaps, than can be counteracted by all the educational, moral, and religious accessing the entire city. and religious agencies in the entire city and I desire most distinctly to repudiate the remotest impulation of any sympathy or toleration for such hot beds of vice and

Well To-Day, Sick To-Morrow, Such is the experience of thousands. Yew enjoy continuous health. To what does the occasions nvalid attribute his uncertain condition? Not to nimse f, of course. He lays the blame on the climate, perhaps. It is too hot, or too cold, or too damp, or too dry, or too variable. But does he take the proper course to fortify his constitution and bedily organs sgalast the extremes and changes of which he complains? No. He rays perhaps, that only an iron man could bear such great heat, or such violent cold, or such andden riclasitudes. Why then does he not resert to the great Tonic and Preventive, which, if it will not make him an iron man, will at least quadruple the espacity of h's system to repet all external agenles that tend to produce disease. HOTETTER'S CRLEBRATED SIOMACR BITTERS, taken faithfully according to the directions, will so strengthen the stomach, brace the nerves, tens the liver, and regulate and invigorate the whole animal machinery, that the system, instead of being at the mercy of the weather and liable to be pros trated by every change of temperature, will become case-hardened, as it were, and almost impervious to climatic influences.
